## RENT A SUSTAINABLE PROJECT

Dear colleagues from the trade fair industry,  
Dear business partners,

Today we would like to introduce you to our expo-rent.me project store. A material sharing platform for all those involved in the development of trade fair concepts and conferences.

The aim is to make the wealth of attractive hall layouts, lounges, exhibitor areas and special areas in the portfolio of Arno Design and Messe München available to all interested organizers and planners.

Thanks to its versatility, our project store enables a unique approach to the conception and realization of first-class indoor areas and outdoor areas and is groundbreaking when it comes to economy and organization.

The transparent cost preview and detailed plans with professional images available in advance make budgeting and letting quick and easy. This is cost-efficient and saves nerves.

The multiple use of existing assemblies also means that all ecological and sustainability standards are met. Costly new productions with high material and energy consumption can be avoided. Residual waste at trade fairs is minimized. The hall structures and exhibitor areas can be flexibly combined and can be easily adapted to the respective event theme and modified to meet specific customer requirements.

As a renowned full-service agency, we stand for spectacular design and fresh ideas, but also for perfect solutions in functionality and organization.

Please see for yourself how easy it is to develop a successful hall concept and let us inspire you.
