

HOW CAN MY TRADE FAIR PROJECT BECOME A BEACON OF SUSTAINABILITY AND COST-EFFECTIVENESS?

Arno Design supports trade fair companies and organisers with the expo-rent.me project shop. Here you will find a constantly updated range of attractive exhibition concepts that can be easily customised for any hall space and industry theme. Everything is designed to be modular and reusable, making it very cost-efficient. The systems meet the high standards of sustainable project planning and construction. The budget framework is immediately apparent. We offer full-service support, including planning, budgeting, marketing and realisation. The complete solution for all your projects: Indoor, outdoor, virtual.

SUSTAINABILITY AND DESIGN

As an official partner of Messe München, Arno Design is responsible for the design of consistently sustainably built pre-built exhibition areas, the cafés and the large Decarb Forum. Our project shop combines attractive design with all the requirements of sustainable construction. The result is an innovative and unconventional exhibition architecture that is convincing in every respect and is more than just an ecological token solution.

WHAT WE CAN DO FOR YOU

Rapid concept and detailed planning of the selected projects with convincing 3D visualization and all presentation documents. Clear and comprehensive communication with your interested parties and exhibitors at every stage of the project. Transparent and reliable cost structures. Our material planning platform and the project store are the tools for optimized event planning at a high design level. Successful and cost-efficient, even with tight deadlines and low budgets.
